**Reach the
office in a
green way
and earn
points!**

Promote Sustainable Transport

- By integrating generative AI into the scoring system, ItalGas can transform its workplace into a hub of technological and sustainable practices.

Gamification and Community Engagement

- Earn bonus points by having fun!
- Leader-boards: Compete against colleagues to win additional welfare credits.

Roadmap

Scooty the Chatbot

Quick and informal survey

Understand employees' travel habits, distance to cover, preferences and potential barriers.

Generative AI Scoring Model

Variables:
*commuting time,
cost-effectiveness,
real-time traffic
conditions, weather.*

Premiate the *Greener*

The green points received everyday can be converted in additional welfare services.

Leverage generative AI models to create tailor-made scoring model

Do you get to work by bus?

- Upload your bus ticket (or pass) on the platform
- Your points go directly in the AI-scoring model
- Receive extra points to be converted in discount for bus fees.

Do you use your bike?

AI-enhanced Image Recognition

To verify the use of sustainable transportation methods, employees should:

- Upload a photo when leaving
- Upload a photo when parking the bike at the office

AI-powered image recognition technology automatically analyzes the uploaded media

This eliminates the need for manual verification and ensures accuracy and efficiency

GRENPID

SCOOTY THANKS YOU ALL!
