CONNECTING MINDS FOR CLIMATE ACTION

INSPIRING TALK WITH

Laur Hesse Fisher

Program Director for Public Engagement, Environmental Solutions Initiative
Massachusetts Institute of Technology-MIT

MODERATED BY

Giorgio Ventre

President of Campania NewSteel Incubator
Director of DIETI, University of Naples Federico II

Laur Hesse Fisher leads the development and execution of public engagement on climate change for ESI-Environmental Solutions Initiative, the MIT's institute-wide effort to mobilize the substantial scientific, engineering, policy, and design capacity of the community to contribute to addressing climate change. Previously, she was the Climate CoLab project manager at the MIT's Center for Collective Intelligence.

The talk will focus on how new digital technologies can help harness collective intelligence to address environmental problems and sustainable development. It is addressed especially to young generations of students, researchers and citizens in a dynamic reverse discussion with the speaker.
